PROFILE

Computer Science graduate working in IT support, responsible for the infrastructure client offices run on — desktops, printers, servers and networking — and for administering the accounts that reach it. Practical grounding in networking, Linux and access control, built both at work and in a home lab I designed and maintain myself. I am working toward a career in cyber security, starting from network defence and systems hardening rather than from theory.

EXPERIENCE

Assistant IT Support

January 2026 – Present

Manakamana IT Solutions — Basundhara, Kathmandu

Intern January – April 2026; full-time employee from May 2026

- Troubleshoot, set up and maintain the IT infrastructure clients run their offices on, including desktops, printers, servers and networking systems.
- Administer user and administrator accounts across client office systems and the company's e-commerce platform, controlling what each role is able to reach.
- Repair and service end-user hardware, including desktops, laptops and printers.
- Maintain a written record of faults and their resolutions, building an internal reference so recurring problems are not diagnosed from scratch each time.

EDUCATION

BSc (Hons) Computer Science

2021 – 2025

University of Wolverhampton, at Herald College Kathmandu

- Coursework across networking, operating systems, databases and software engineering, including routing and switching in Cisco Packet Tracer and traffic analysis in Wireshark.

Higher Secondary (NEB) — Management with Computer Science

2021

Saipal Academy, Kathmandu

Secondary Education Examination (SEE)

2019

Prithwi Secondary Boarding School, Kathmandu

TECHNICAL SKILLS

Networking	TCP/IP, routing & switching, LAN configuration, network troubleshooting, Wireshark, Cisco Packet Tracer
Systems	Linux server administration, NAS & storage, SMB file sharing, firewall rules, backup & recovery, desktop and printer support, hardware repair
Security practice	User & role administration, access control, remote access hardening (Tailscale / WireGuard), issue documentation
Cloud & tools	AWS, Azure, Linux deployment, Git & GitHub, Jira
Programming	Python, JavaScript, Java, C#, SQL, PHP, React, Node.js, MySQL, MongoDB

ACADEMIC & PERSONAL PROJECTS

Personal NAS & Home Lab

2025 – Present

Linux · Tailscale / WireGuard · SMB · Jellyfin

- Designed, built and self-manage a Linux network-attached storage server with mirrored storage and SMB shares for the devices in the house.
- Reach it remotely over a Tailscale mesh network instead of forwarding ports, so no service is published to the public internet.
- Deployed and maintain a Jellyfin media server on the same host.

Cloud-Hosted Web Application

2024

AWS · Azure · Linux · JavaScript · SQL

- Deployed a full-stack web application across two cloud providers, configuring the Linux server environments from scratch.
- Implemented CRUD functionality with optimised database interactions for reliable data retrieval.

Automated Agent Simulation

2025

Unity · C# · A* · Ant Colony Optimisation

- Built three autonomous delivery agents navigating a 3D city environment constructed in Unity.
- Implemented A* pathfinding and Ant Colony Optimisation to drive agent decision-making. Awarded first place at the Game Vision project showcase.

Grocery E-Commerce Website

2024

React · MongoDB · HTML / CSS

- Built a full-stack e-commerce platform with a responsive front end as part of a development team.
- Integrated a payment gateway, built an admin dashboard and designed the MongoDB schema.

Course Management System

2024

Java · MySQL · Java Swing

- Desktop application for managing academic records, courses and student data, including administrator tools and the permissions governing who could change what.

CERTIFICATIONS & ACHIEVEMENTS

- Cisco Networking Academy — Introduction to Cybersecurity (*in progress, 2026*)
- C# Language — SoloLearn (2024)
- First place, Game Vision final-year project showcase
- Peace Education Program — Prem Rawat Foundation (2026)
